

TANG CHEE KIN

Degree Year 2 Artificial Intelligence Student

A second-year Computer Science (Artificial Intelligence) undergraduate with a solid background in software engineering principles and academic project development. Highly analytical and collaborative, with a proven track record of coordinating team efforts and delivering technical solutions. Passionate about machine learning and logical problem-solving, I am eager to apply my technical skills and adaptability to innovative development teams.

WORK EXPERIENCE

Business Application Intern

Sep – Nov 2025

MAMEE DOUBLE-DECKER (M) SDN. BHD. | Subang Jaya Branch

Provided comprehensive application support for both mobile and backend platforms, ensuring seamless operations while actively facilitating enterprise-level system upgrades. Additionally, I orchestrated detailed data migrations, executed rigorous user acceptance testing, managed successful project rollouts, and delivered effective end-user application training.

- Application Support (Mobile App & Backend)
- Enterprise Level System Upgrade
- Data Migration Preparation
- System Testing & User Acceptance Test
- Project Roll Out
- Application Training

Data Entry Clerk

KINERGY ADVANCEMENT BERHAD | Sri Petaling

Apr – June 2023

Performed meticulous electrical item quantity take-offs and streamlined project workflows through accurate data consolidation. Additionally, I managed comprehensive document control processes and handled technical printing to ensure all project documentation was organized, up-to-date, and readily accessible for the team.

- Electrical Item Quantity Take-Offs
- Data Consolidation
- Document Control
- Technical Printing
